
PROJECT MANAGEMENT SOLUTIONS

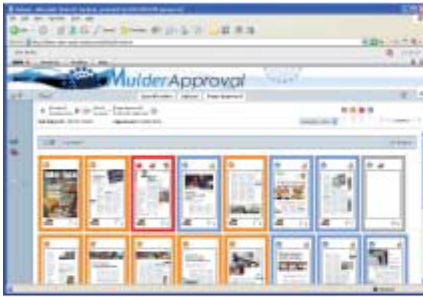

:Delano

Project Management Portal
for print and publishing professionals.

In today's fast-paced publishing environment, brand owners, printbuyers, project teams, creatives, customers, and production partners are confronted with communications chaos. We face a rapid growth in short-run jobs, highly automated workflows and a continuous revolution in the world of electronic communications. Print professionals and creatives have to collaborate like never before, to speed last-minute changes and efficiently control digital assets. Amidst all the

change, one thing remains constant: the challenge to reduce costs and streamline the entire publish and print process – while maintaining the highest standards of quality. Using :Delano is like opening a window onto your entire operation. It provides a critical view of every project in the workflow, along with a suite of interactive communications tools that reaches from client to completion.

:Delano WebApproval

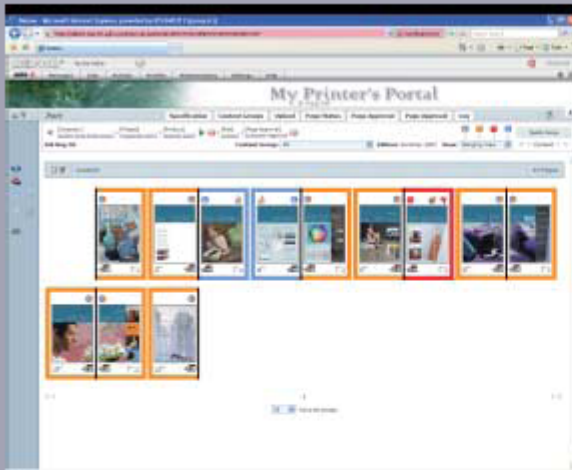

Upload and Approve your files online

With :Delano WebApproval, the efficiency of your :ApogeeX workflow can be propagated towards your customers using the internet. :Delano WebApproval simplifies communication with print buyers by enabling them to upload files and almost instantly view proofs generated by :ApogeeX. Within :Delano WebApproval it is possible to approve or reject pages or imposed flats using a Web browser. Not only do you gain the efficiency of online proofing, but because the original pages are processed by :ApogeeX at all times, you get added reliability. WebApproval allows you to provide impressive service and faster delivery. It promotes the winning business relationships that help you stay ahead.

Benefits

- Submit and check pages online, without delays of transport
- Provide page and Signature Approval
- Retrieve pages for local hardcopy proofing
- Pro-active customer communication
- Warn about preflight issues
- Add value with faster project turnaround
- Reduce courier and transportation costs
- No large PDF files attached to your emails in an e-mail system without project/product-awareness

PROJECT MANAGEMENT SOLUTIONS (ctd)

:Delano ProjectManager

Interactive, Customer-Focused Project Management for Commercial Printers

:Delano ProjectManager was designed for mid- to large-sized printers looking to further automate and integrate processes. For any printing company that wants to offer Web-based client collaboration including file submission, softproofing and job approval, :Delano ProjectManager is the perfect solution. :Delano ProjectManager integrates customer service, page processing, prepress, press and post press for flawless job management. Each level of integration reduces overhead, eliminates redundancies, speeds processing, and reduces cost. :Delano ProjectManager integrates with prepress systems for complete project management and workflow integration. For example in addition to page and page-spline views,

:Delano ProjectManager lets you view pre-RIPped signatures. It lets you create JDF Job Tickets and provides automated file delivery to :ApogeeX or non-Apogee systems.

Benefits

- Better utilization of press capacity
- Higher Customer Service Representation productivity and efficiency
- Simplify production procedures
- Reduce errors and operating costs
- Share information throughout multiple production plants
- Collect information for job costing purposes
- Link your entire business together by integrating administrative and production systems from multiple vendors

:Delano StreamProof Option

Advanced Tools enhance :Delano Online Collaboration

As a communications hub, :Delano gives members of the project team access to centrally stored client data, project instructions, assets and project status. It alerts them when a proof, which they can access using a web browser, is ready for approval.

The :Delano StreamProof option takes online approvals to the next level with fast high resolution viewing, zooming and real time annotating. Now rendered pages can be viewed and checked to the finest detail, even over a slow dial-up connection.

Benefits

- Easily attach sticky notes or mark up areas with detailed instructions on the host site in real time.
- The streaming technology ensures superior data transfer speeds, even with slower internet connections.
- Colour matching technologies for reliable and colour accurate online proofing.
- Collaborate online on the same document and see each others corrections & annotations immediately.
